

Question #4: Which expectations should the evaluation of my students be focused on.

The best response for this question can be found in the S&T document.

All curriculum expectations must be accounted for in instruction, but **evaluation focuses on students' achievement of the overall expectations**. A student's achievement of the overall expectations is evaluated on the basis of his or her achievement of related specific expectations. The overall expectations are broad in nature, and the specific expectations define the particular content or scope of the knowledge and skills referred to in the overall expectations. Teachers will use their professional judgement to determine which specific expectations should be used to evaluate achievement of the overall expectations, and which ones will be covered in instruction.
